

ENVIRONMENT, HEALTH & SAFETY POLICY

PV Clean Management is firmly committed to protect Environment & provide a safe, injury free & a healthy environment in all premises and locations where our personnel perform work.

We strive to achieve this by putting a process of identification & elimination of Environmental aspects & safety hazards & risks. As a policy, we look for converting the identified risks into opportunities.

We provide the Designs, equipment and processes which help to continually reduce pollution related to Air & Water and enhance environmental and safety performance.

We strive to achieve this through Continuous and intense training with worker participation that puts Environment & safety first. We are committed to comply with applicable legal and regulatory requirements and recognize environment, health & safety as an integral part of our business philosophy.

QUALITY POLICY

At 'PV Clean Mobility Technologies', we are committed to achieving Total Customer Satisfaction by delivering superior quality of products and services conforming to specified & implied requirements of quality, cost & delivery. To reach higher benchmarks on quality, we will internalize global best practices and sustainable technologies within the organization.

The management commits itself to encourage and support all efforts and practices for accomplishing these objectives, by effectively implementing a comprehensive Quality Management System (QMS) and by engaging, developing, and motivating the entire workforce towards continual improvement. In our pursuit of excellence, PVCMT shall meet the statutory and regulatory norms in respect of Environment, Health and Safety.
